MANUAL DRAFTING KIT

For the first time, we are now offering a complete drafting kit. The manual drafting kit includes all of the tools specified in Practical Drafting. The manual drafting kit consists of high quality tools that I selected and will surpass your student's needs. The retail price of all of the equipment is around \$120.

Due to the low price we are offering, these kits are only available directly from us and all sales are final. If the product is damaged in shipping, please contact us right away. We exchange only for items that may arrive damaged.

Grade: Junior High to High School

Item: PDKIT

Price: \$95.00

Manual Drafting Kit Includes:

Small Drafting Board
T-Square
English Scale
Metric Scale
Circle Template
45/45/90 Triangle
30/60/90 Triangle
Bow Compass/Divider
.3mm Mechanical Pencil
.5mm Mechanical Pencil
.7mm Mechanical Pencil
.9mm Mechanical Pencil
Eraser - White
Erasing Shield
Drafting Dots
Isometric Ellipse Template

CAD SOFTWARE

We offer two CAD programs for sale, both are great tools for learning CAD. There are definite benefits to both and I will try to cover the differences here on this page. We offer discounted prices for a few combinations that include TurboCAD® Student Edition and Practical Drafting™ when you purchase them directly from us.

TurboCAD® Student Edition by IMSI®:

TurboCAD® is a great starting point for learning to use CAD programs. Being able to do both 2D & 3D drawings as well as true 3D solids modeling, it gives the student a good foundation for going on to use other CAD programs. We recommend TurboCAD® for beginning students because of its ease of use, easy to follow and understand student guides, and documentation. TurboCAD® uses a graphical interface that is clear and simple to use.

- > AutoCAD® file compatible
- > Student Edition in this case simply means that it is one revision behind the commercial version. There are no built-in limitations or watermarks.
- > Provided with two books that teach TurboCAD
 - Module 1 teaches 2D TurboCAD with interactive lessons on CD
 - Module 2 teaches 3D TurboCAD with interactive lessons on CD

Format: CD & paperback

Item number: TCAD

Price: \$150.00

System Requirements:

- Pentium II class processor
- 128 MB RAM
- 55 to 220 MB of free hard disk space depending on accessory applications installed
- 64+ MB of swap space
- Super VGA (1024x768) display
- High Color (16bit) graphics card
- 4X CD-ROM drive
- Windows 98/ME/NT 4.0/2000/XP
